

Dear Parents/Guardians,

All Saints Academy students in grades 2-8 take the math, reading, and language usage assessments in both the fall and spring. Today, copies of your child's fall NWEA Measure of Academic Progress (MAP) assessment results will be sent home.

The MAP assessment reports coming home today were created specifically for parents. An important note for 2nd-grade parents: since this is your child's first time taking the MAP test, you will only see a line graph that represents your child's overall score on the Family Report. Should you receive this same report in the spring, after the 2nd graders have completed their spring assessments, you will see a bar graph on the right side of the report, which will show your child's growth on this assessment from fall to spring.

As you review these reports, please keep in mind that the MAP assessment provides only one point of data, and we consider many points of data when assessing how students are developing academically. We do not share these results with your children while at school, as these results are not feedback-driven—meaning we are not expecting students to do anything in response to them. You are welcome to share the test results with your child at home.

Tracking this data point over time helps us observe student growth. MAP data also helps our educational team make appropriate instructional decisions for students, as well as identify students who may need additional support. If at any point you have any questions or concerns about your child's academic progress, please never hesitate to reach out to your child's classroom teacher, and our team will continue to keep you informed of your child's academic progress as well.

If you have any questions regarding these reports or need support interpreting this data, please reach out to your child's teacher or either one of us. We are happy to help and thank you for your continued partnership!

Many Blessings,

Megan Schneider
Lower Campus Principal

Michael Debri
Upper Campus Principal
